

## Iron Age Evolved

Lecture by Mike Weber, Cornwall Iron Furnace  
Associates  
Tuesday, March 8<sup>th</sup>, 2022, at 7 PM

Lecture: Iron Age Evolved

Tuesday March 8th, 2022 at 7 p.m.

Ever wonder where the technology of the Cornwall Iron Furnace came from and who developed it? We know that Peter Grubb constructed the furnace and served as its first iron master in 1742. Did Peter Grubb invent the technology for the cold-blast charcoal furnace? Mike Weber attempts to answer these questions and more in a brief review of over 5000 years of history and technological innovation that culminated in the Cornwall Iron Furnace. Please join the Cornwall Iron Furnace Associates and Mike Weber for this virtual presentation on Tuesday evening, March 8<sup>th</sup>, at 7 p.m. via Zoom.

The presenter will be Michael Weber, who volunteers as a guide and researcher at Cornwall Iron Furnace. As a 1982 geosciences graduate from Penn State, Mike worked for 36 years as a geologist, health physicist, and manager for the U.S. Nuclear Regulatory Commission and the U.S. Geological Survey. After retiring from Federal service, he returned to Cornwall Furnace, where he serves as a guide and researches the history of mining and the geology at Cornwall and similar deposits in PA.

Mike Emery (CIF Administrator) will moderate a brief discussion at the end of the presentation.

This is an online lecture that will utilize the Zoom platform.

Space is limited, and registration is required. To register please go to:
